Saja Hamed Abu Mandeel

Front-End Developer (React)

Gaza, Palestine
linkedin.com/in/saja-hamad-dev • github.com/sajahamad • saja-hamed-portfolio.vercel.app

PROFESSIONAL SUMMARY

Front-End Developer building responsive React web applications with modern JavaScript, Tailwind CSS, and REST API integration. Led a 3-person team to build Rentora, a multi-category rental marketplace that placed 4th in a hackathon, and built Ibdaha Sah, a live platform helping high-school students choose their university major. Uses AI-assisted workflows to speed up development.

EXPERIENCE

Front-End & Digital Projects Specialist — *Zero To Hero* *2024 – Present*

- Build and maintain React-based interactive web applications and features for the company's digital platforms.
- Mentored 100+ students on engineering career paths, choosing a specialization, and starting strong in front-end development.
- Create digital content and coordinate content strategy across multiple concurrent projects.

Front-End Development Intern — *Webura Company* *April – June 2026*

- Built responsive, user-friendly interfaces with React in a live team environment.
- Contributed to multiple client-facing projects alongside a collaborative development team.
- Applied clean-code practices, responsive design, and cross-team communication.

Content Creator & Student Mentor — *Ibdaha Sah (Start It Right)* *Ongoing*

- Create study-skills and engineering-guidance content that has reached and helped 30,000+ students.

SELECTED PROJECTS

- **Ibdaha Sah:** Live platform helping high-school students choose their university major. start-it-right1.vercel.app
- **Rentora:** Team leader & front-end developer of an all-in-one rental marketplace for properties, vehicles, equipment, and services. Built during TAQAT's CodeMap 2026 program; placed 4th in a hackathon. React, JavaScript, REST APIs, Tailwind CSS.
- **Personal Portfolio:** Bilingual (Arabic/English, RTL/LTR) portfolio with dark mode and an embedded AI assistant. React, Tailwind CSS. saja-hamed-portfolio.vercel.app
- **Gaza Voice:** Responsive Arabic (RTL) news platform. HTML5, CSS3, Bootstrap, JavaScript.
- **E-Commerce Platform:** Modern storefront with API-driven product data. React, Vite, Tailwind CSS.
- **Interactive Weather App:** Real-time weather dashboard consuming a public REST API. React, Vite.

TECHNICAL SKILLS

Languages & Core: HTML5, CSS3, JavaScript (ES6+)
Frameworks & Libraries: React.js, Tailwind CSS, Bootstrap
Tools: Git, GitHub, Vite, REST APIs, Figma (design handoff), Vercel
AI & Automation: Claude Code, Prompt Engineering, Anthropic API

EDUCATION

B.Sc. Computer Systems Engineering — *Al-Azhar University – Gaza* *Expected 2027*

TRAINING & CERTIFICATIONS

- CodeMap 2026: 144-hour React training program, team leader — TAQAT Academy (2026)
- Front-End Development Track (120 hours) — Zero to Hero
- AI Fluency: Framework & Foundations — Anthropic / UCC / Ringling College
- Claude Code 101 • Claude with the Anthropic API — Anthropic
